

Prevents the formation of condensation or frost on the inside of glass door coolers or freezers

# DECALS

## ANTI-FOG FILM

### PRODUCT USES

- Reduces or eliminates condensation/fog on the inside of cooler glass doors.
- Reduces or eliminates frost on Class 3 commercial freezer glass.

### FEATURES

- Abrasion, scratch, mar and chemical resistant which helps to keep your glass door clear and protected.
- Decal has permanent adhesive to keep the film from peeling off or rippling.
- Optically clear, so customers can view the product with the door closed, saving energy.
- Available in sizes up to 28" wide with any height.

### APPLICATION

Installation of film requires glass to be at room temperature. Cut decal to size. Clean the interior glass surface of the cooler door and dry. Apply application fluid on the glass and anti-fog film. Align to glass door, then squeegee out application fluid from top to bottom. Let stand for 24 hours then peel the premask off.
