

IR Sensor Camouflage

IR sensing and monitoring devices are becoming a mainstream method of enhancing our safety and health. These devices function well, but they poorly impact design and aesthetics, until now with the use of our Sensor Camouflage films. Camouflage films hide these unsightly infrared detectors and emitters and provide flexibility in the design while maintaining functionality. These films allow for high specular transmission while scattering, absorbing, or reflecting visible light. DALB and 3M together continue to bring new innovations to the table that solve problems and enhance aesthetics. Reach out to us today to learn more about this next gen technology.

Available Versions

- Colored
- Patterned
- Texture
- Shapes
- Printing

We can seamlessly integrate into your design!

Primary Requirements

- High IR %T
- High hiding power
- Low IR scattering
