

# Laser Ablatable Sheet

THE ONLY SOLUTION OF ITS KIND!

Laser Ablatable plastic sheets are pre-painted and available in any color. The paint can be removed during the laser ablation process to create design patterns including letterings and markings. This allows for the creation of backlit customizable dashboards, switches, control panels and more.

Available with low minimum order quantity and in a sheet size suitable for your laser. Whether large or small, DALB's process creates options for a custom color match along with control of the opacity of the sheet.

DALB Laser Ablatable sheets are available in a cast acrylic or on your own choice of material and can include various layers of color for different finishing effects.

## Laser Ablatable Sheet Benefits

- Eliminate costly laser engravable plastics for prototyping
- Pick your color and eliminate post forming painting
- Metallic colors available

## Applications

- Control Panels
- Switches
- Dashboards
- Signage
- Prototyping
- Medical
- Bus and Rail
- Safety
- Aerospace
- Marine
- Military
